Kyle Krause

(248) 309-0129 kkrause317@gmail.com White Lake, Michigan

Passionate designer and developer, focused on real-time 3D, UI/UX, video games, and engine and tools design/development, with a multidisciplinary technical and creative software skillset. I am experienced in shipping production code and assets in cross-functional teams.

WORK EXPERIENCE:

Orion Geospatial AI, **Frontend Software Engineer** (part time) *March 2025 - August 2025*

- **Vue.js, Python, PostgreSQL, Jira**
- Delivered features in high density, interactive geospatial data and LLM AI chat interface.
- Bi-weekly deployment to 10+ large business clients, integrating feedback throughout.
- Iteration with coverage testing, peer coding, and reducing overall site bug count.
- Responsive and functional design with code review. Work with an international team.

Space Warp Software, **Software Engineer, Designer** (contract based) *March 2025 - Present*

- **React Native, Figma, Inkscape, MySQL**
- Cross-platform React Native app development (3 person team) from scratch to an MVP.
- Delivered and led client/user facing **UI/UX design, logo/graphic design**.
- Interfaced regularly with clients to tweak design direction and development breakdown.
- Designed and delivered dozens of frontend features and api endpoints for core functionality, integration with existing frameworks, scalable user management, etc.

LostForge SoftWorks, **3D Artist** (contract based) *November 2025 - Present*

- **Blender, Aseprite, RPGMaker**
- Led art production for a 4-person indie team. Making game assets (textures and 3D models), styled to intended art direction and existing game content.
- Created 15+ in-game assets within resource budgets, polygon/resolution requirements.

Untethered IO, Inc., **Software Engineer, Designer** (freelance) *April 2023 - Present*

- **Unreal, C++, OpenGL/GLAD, React Native, C#, Jira**
- Cross-platform 3d Graphics Engine Development; App Development & UX Design.
- Worked with industry veterans in consistent, long-term software development, maintaining and iterating software over periods of 3+ years.
- Delivered readable, robust engine documentation; easy-to-read multi-platform code.

EDUCATION:

University of Michigan - Ann Arbor (Junior): *2023 - 2027*

- Working towards B.S. in Computer Science @ College of Literature, Science, and Arts
- EECS 298 (**3D Technical Art and Animation**), EDUC 333 (**Video Games and Learning**), DIGITAL 333 (**Video Game Music**), MUSIC 460 (Writing About Video Game Music), FTVM 210 (Screenwriting), EECS 481 (Software Engineering)
- Game Development Club (Wolverinesoft), Michigan Animation Club

Past Honors: Mathematics Department Key Award, AP Scholar with Distinction

---

Kyle Krause (248) 309-0129 kkrause317@gmail.com White Lake, Michigan

NOTABLE PROJECTS:

Computer Quest! (Video Game) *Fall 2025*

- **Blender, Unity, Audacity, Aseprite, Reaper**
- Created art, models, textures, music, and sound effects to release a small title showcasing modeling and animation skills. Programming and Unity project given by class professor. Playable on the web.
- Shipping an indie-level game with my own art, animation, and music.
- Platformer, final project for EECS 298: 3D Technical Art and Animation.
    - https://kylekrause3.itch.io/computer-quest

Snowball Fight (Solo Video Game) *Fall 2025*

- **Blender, Unity, Audacity, Aseprite**
- Models, programming, textures, and sound effects design.
- Game jam-esque development cycle, created in a few evenings.
- Round based PvE game.
    - https://www.youtube.com/watch?v=OlZATm-3Y7k

LearnOpenGL (Solo Graphics Engine): *Fall/Winter 2022-2023*

- **OpenGL/GLSL C++**
- 3D graphics rendering and lighting engine intended for use in 3D development.
- Low level, real time 3D programming. Lighting with shaders and rendering with linear algebra. 3D spline representations.
    - https://github.com/kylekrause3/LearnOpenGL

Old School RuneScape Clone, (Solo Video Game): *August 2022-2024*

- **Unity, C#**
- 3D third person point-and-click adventure game, based on Old School RuneScape.
- Game/level design centered around what feels fun and fits into the world, designing mechanics that build on top of one another, environmental storytelling.
- First deep look into game programming and design.
